

The Computer Entertainment Developers Conference (CEDEC) is an international technical conference organized by the Computer Entertainment Supplier's Association (CESA; an industry organization), with the aim of improving the technical abilities of the Computer Entertainment industry.

In an industry that is today experiencing dramatic innovation, the conference is positioned as one of the most important events along with the Tokyo Game Show. At the conference, you can share the latest technologies and business information across the borders, between the industrial, academic and governmental sectors.

CEDEC provides public relations programs and advertising opportunities in the form of exhibition spaces and sponsorship sessions. This is an ideal opportunity to promote your company's products and services directly to developers.
